your personal style**

NATIONAL GLASS
Diamond Quality Glass & Service

make a statement with glass

| Say the word "glass" and most people think of a plain, transparent surface. |

But while the pure beauty of clear glass will always have its appeal, there's a lot more to the subject than that.

Modern decorative glass offers you an unrivalled palette to create stunning architectural effects. From semi-translucent splash backs and bench tops in the kitchen, to balustrades, partitions and furnishings throughout the home – nothing comes close to glass with its range of effects.

Unleash your creativity with decorative glass from the people who understand the possibilities better than anyone else.

glass that's designed to be looked at

Create a world of colours, patterns and textures with National Glass. We can add character and individuality to your home, whatever its architectural style. From purely decorative designs to ingenious structural applications, National Glass will work hard to bring your ideas to life.

Our speciality decorative glass range captures light and transforms it into brilliance. Whether you're looking to recreate a historical effect or conjure up a stunningly original concept, we have the range and the skills to deliver a solution.

Choose the colours, patterns, textures and effects you want

National Glass offers you an unmatched collection of colours, styles and textures to create a unique look. And we won't just hand you a brochure and leave you to work out the details. Our expert team are on hand to discuss all the technical parameters and practical issues that arise when you're bringing a design to life.

CUSTOM-MADE FROSTED GLASS

SPLASH BACK GLASS

even a practical design can be a work of art

it may be functional but it doesn't have to be boring

With its easy-clean surface and virtually endless applications, decorative glass is ideal for practical items such as kitchen splash backs, bench tops, wall linings, partitions, balustrades, floors and stairs.

Splash backs

Our range has particular appeal for kitchen designers seeking the perfect splash back. Choose from our comprehensive palette of colours, or we can match back-painted glass to your preferred colour scheme.

Back-painted toughened safety glass is ideal as a splash back for stoves or gas hobs. Diamant Low Iron Glass, which is clearer than the 'green' tinge associated with normal clear glass, will more accurately reflect your colour choice.

Private viewing by invitation only

Allowing privacy while still making a stylish visual impression, decorative glass gives you fantastic options when designing a home. There's no need to sacrifice natural light. Just specify one of our semi-translucent glass products, and enjoy the benefits of security and privacy.

Screen-printed glass

Emalit is an opaque coloured glass where enamel is fired into one side at a very high temperature for exceptional durability and scratch resistance. Available in 14 standard colours, it can also be colour-matched to most colours. It's ideal as a surface for screen-printing with designs such as lines or grids, to provide extra privacy without losing translucence.

Textured, obscure or patterned glass

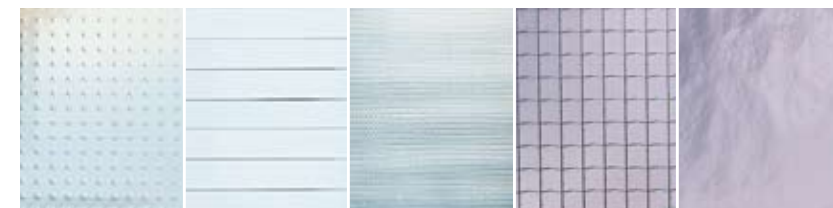

Traditionally made by casting and rolling glass through embossed cylinders, this translucent style glass is ideal for creating subtle light effects with a degree of privacy. Etchlite (also known as acid etched, frosted or translucent glass) is a modern alternative. Treated on one side to produce a satin, soft white look, it filters light to soften contours and ensure privacy. Applications include furniture, bathrooms, cabinets, shelving, partitions, showers, balustrades and facades.

NOTE: Non-standard designs and colour matching require additional lead times. The thickness of the glass can affect the final colour of the product, so for uniformly coloured surfaces, a single thickness of glass should be used.

special effects that will impress any audience

make full use of the creative possibilities

Deco

Modern techniques and materials simulate the look of traditional windows and leadlight effects for both internal and external use. The materials we use are unrivalled for durability and UV stability. They won't crack, peel or fade and are guaranteed for 10 years. A colour palette of blue, red, cerise, green, yellow and violet allows scope for intricate patterns and vibrant colours. We can also provide other colours to match a personalised design. Use our standard patterns and design, or ask us to custom-make to your own designs, sizes and colour schemes.

Sandblasting

Sandblasting plain glass with sand and air at high pressure creates a frosted panel. You can also explore the possibilities of sandblasting other designs or patterns – creating exciting unique effects for indoors and outdoors.

Crystal Cut and V Cut

Crystal Cutting, also known as V Cutting provides elegant, linear engraving on glass for door panels, mirrors, cupboard doors and other settings. It can be used on all types of glass, including safety glass.

Evasafe custom laminating

Evasafe custom laminating lets you create unique glass features that are safe as well as creative. The process is compatible with an extensive range of media and inserts. These include polyesters (printed, coloured, solar control or metallic), polycarbonates, acrylics, fabrics, photographs, stone and wood veneers, natural materials such as leaves, perforated metals, LEDs, plastics and electroluminescent inserts. For more information refer to our laminated glass brochure.

Mirrors

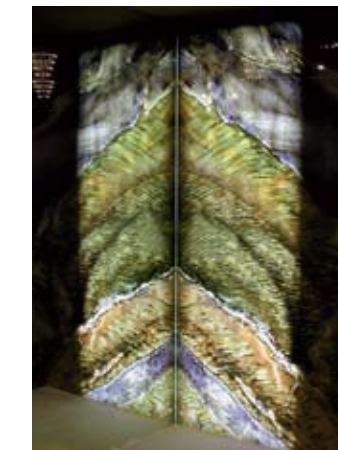

National Glass can help you create mirrors in a variety of shapes, sizes and designs, with polished and bevelled edges or decorative effects such as sandblasting or v-cuts. Heating pads can be added behind the mirror to provide a mist-free surface.

Our mirrors are produced without copper or lead. This innovative manufacturing process is kinder to the environment while improving the durability and optical quality of the product.
